Summary.

As a fourth-year doctoral researcher at the University of Mannheim, I study the limitations of large language models in resource-constrained multimodal and multilingual settings. My specific focus is the intersection of multimodal learning and neural program synthesis, particularly in graphics program synthesis with vision-language models. This field explores how multimodal AI systems can generate programs that compile to visual media. I also have experience with pre-training token-free language models for style-conditioned poetry generation without the need for manually imposed stylistic constraints, as well as developing unsupervised evaluation metrics for machine translation of low-resource languages.

Higher Education

University of Mannheim & Bielefeld University

Mannheim & Bielefeld, Germany

May 2022 - Present

Ph.D. IN COMPUTER SCIENCE

- Focus: Natural Language Processing & Machine Learning
- · Topic: Multimodal and Multilingual Text Generation and its Evaluation under Resource Constraints

Darmstadt University of Technology

Darmstadt, Germany Apr. 2019 - Oct. 2021

M.Sc. in Computer Science with minor in Electrical Engineering

- · Graduated with honors
- Final grade: 1.29 (German 5-point scale)
- Thesis topic: Self-Learning for Unsupervised Evaluation Metrics
 - Third place in university-wide thesis competition

Darmstadt University of Technology

Darmstadt, Germany

B.Sc. IN COMPUTER SCIENCE

• Final grade: 1.48 (German 5-point scale)

• Thesis topic: Text Generation from Knowledge Bases

Oct. 2016 - Mar. 2019

Experience _____

Adobe Research Lyon, France

RESEARCH INTERNSHIP Apr. 2025 - Sep. 2025

• Explored procedural material generation with large vision-language models.

National Institute of Information and Communications Technology (NICT)

Kyoto, Japan

RESEARCH INTERNSHIP

Aug. 2024 - Mar. 2025

• Conducted research on zero-shot text-guided graphics program synthesis.

Natural Language Learning Group (NLLG)

Computational Linguistics

Darmstadt. Germanv

RESEARCH & TEACHING ASSISTANT

Nov. 2021 - Feb. 2022

- Conducated research on new evaluation metrics for machine translation.
- Assisted in organizing lectures and seminars on Natural Language Processing.

Achievements_

AWARDS

2023

ACL Honorable Mention, Proceedings of the 61st Annual Meeting of the Association for Computational

Toronto, Canada

Toronto, Canada

EACL Outstanding Paper, Proceedings of the 17th Conference of the European Chapter of the Association for

Dubrovnik, Croatia

FELLOWSHIPS

2024	NICT Research Fellowship , Financial support to facilitate international research collaborations.	Project funding
2024	Google Cloud Platform Credit Award, Financial aid for selected academic research projects.	Project funding
2020	PROMOS , Scholarship for students completing academic stays abroad.	Monthly grant
2019	Deutschlandstipendium , Scholarship for high-achieving and commited students from all over the world.	Monthly grant

TECHNOLOGIES

Programming Python, C, C++, Bash, Java, Lua

Frameworks & Libraries PyTorch, HuggingFace Transformers, Sentence Transformers, NumPy, Pandas

Development & Deployment Git, Linux, MFX, Docker, Neovim, Gradio, HuggingFace Spaces, Google Colab, Slurm

OPEN-SOURCE PROJECTS

DeTikZify Automated synthesis of graphics programs for scientific figures and sketches.

AutomaTikZ Automated synthesis of scientific vector graphics using text captions.

pantran.nvim Plugin that provides machine translation functionality within the Neovim text editor.

uniformers Library for token-free, character-level language modeling.

umetrics Library for experimenting with reference-free evaluation metrics for machine translation.
